

Project Manager Denmark/Nordics

Urban Radar

Founded in late 2018 between France and Silicon Valley by an expert in urban planning and an expert in Smart City technology, Urban Radar is developing a technological solution and Urban AI designed to support local authorities and design offices in understanding the movement of goods and people within cities and territories through data. Urban Radar's mission is simple: to improve air quality in cities by reducing the impact of transportation.

Urban Radar's technology was immediately recognized as promising and essential for building the sustainable future to which the Paris agreements aspire. Urban Radar's actions with the World Economic Forum, articles in Forbes and its nomination as a laureate of the prestigious European Union Urban Mobility are proof of this.

In Denmark, Urban Radar has been active for 2 years working with the major smart city stakeholders from both the public and private sectors. As the first employee of your newly established AsP entity, you will directly report to our CEO (located in the UK) and will have exciting responsibilities, ranging to working on our strategy to representing Urban Radar to the senior government or corporate representatives we work with. In a nutshell, your role will have impact.

Job Description

Urban Radar is looking for a Project Manager

You will play a key role in the product and strategic direction of Urban Radar in Denmark and the Nordics. We are counting on you to :

- Project Management:
 - You will take charge of our projects from the specifications to the user acceptance and deployment
 - You will build with our product and technology teams the design of the project (customer need, functional specification, subdivisions, deliverables, acceptance criteria...)
 - You will manage the projects by setting up, organizing, coordinating and leading the project team according to the specifications (customer's request, budget, deadlines...)
- Accelerate our growth: promote strategic partnerships in the Nordics and European market to boost sales. You focus on expanding relationships with local authorities, private operators and other stakeholders.
- Evolve the product: with a talent for listening to customer needs, you easily identify specific customer requirements that you can then communicate to our engineers and evolve the product.
- Provide clear communication: ability to quickly analyze and popularize complex topics according to the level of expertise of your audience.

Skills

- 3-4 years experience minimum
- Experience with public entities and/or transportation planning
- Passion for new technologies (data/IoT/IA), cities and transport
- Strong knowledge of the European regulatory and normative framework for transport
- Experience and enjoy(!) complex stakeholder management situations
- Strong entrepreneurial spirit and autonomy
- Danish and English essential, another European language is a plus.

Details

Permanent position, competitive salary, start date: as soon as possible,
